

Supplementary material 01

Localities for observations of *Natrix natrix* and *N. tessellata* in Bulgaria, based on the 10×10 km MGRS grid (Military Grid Reference System, UTM zone 35N, datum WGS 1984)

Data from Kornilev et al. 2023 Distribution of the grass snake (*Natrix natrix*) and dice snake (*N. tessellata*) in Bulgaria. *Historia naturalis bulgarica* 45 (9): 239–254.

References are provided in the main text.

We note some corrections in published localities. A *Natrix natrix* individual was wrongly cited to being found in “Krichimska kuriya (Kovachev, 1912, p. 38)” (Buresch & Zonkow, 1934, p. 152), instead of “Krichim” (Kovachev, 1912, p. 39); we do not map this record. Based on the provided geographic coordinates, the *N. natrix* from “Malko Tarnovo” (NG44) falls within NG45; the two *N. tessellata* from “Tsarevo” and “Ahtopol” (NG76) should be within NG67 and NG75, respectively (Mollov et al., 2022, pp. 51–52); these are included here as published for the corrected UTM cells.

Previously unpublished data

Natrix natrix
